FOR IMMEDIATE RELEASE

## **CodeGreen to Host After Hours Tour of The American Museum of Natural History: Climate Change Exhibit**

**New York, NY**—CodeGreen Solutions is hosting a private tour of the award-winning Climate Change Exhibit at the Museum of Natural History exclusively for their clients that have incorporated sustainable measures into their operations or have achieved LEED certification at their buildings. Patricia Lee, Senior Project Manager for CodeGreen Solutions states, "These buildings have invested in sustainable technologies and operations that allow them to reap the paybacks of higher efficiency and good corporate governance. CodeGreen would like to recognize their efforts and believes the Museum of Natural History's exhibit is a unique and fitting venue for these managers and owners to see some of the environmental benefits their proactive steps and investments yield."

Recognizing that 80 percent of New York's citywide greenhouse gas emissions result from the energy used in buildings, CodeGreen has been able to work with their clients to reduce this overall environmental impact. The Climate Change Exhibit allows a perfect opportunity for CodeGreen to show their appreciation to clients and others who have taken the initiative in the vital role of reducing greenhouse gas emissions.

This exclusive tour will take place Wednesday, August 5<sup>th</sup>, 2009 at 5:30PM at The Museum of Natural History. CodeGreen will also host cocktails and hors d'oeuvres after the tour. If you are interested in being a part of this exciting event, please contact Cassie Corless at ccorless@codegreensolutions.com.
